Unlock powerful insights with a simple question , in any language

Introducing our
AI-based Reporting Tool for all your
ERP Reporting needs

- Ask, Don't query, forget selections through various query screens and selection options / filters.
- Effortless Integration with all your Custom ERP Databases as a SAAS module that can be hosted 'In-premise' or the Cloud.
- Latest Generative AI based LLMs , specifically trained on your Data schema and some synthetic data.
- Your Data is never exposed as we do not use the data but its schema only for the LLMs to get trained
