

LAUNCHING **ConceptZee.ai**

Unlock powerful data insights with a simple question, in any language

Introducing our latest
AI-based Reporting Tool for all your
MIS Reporting needs in an ERP

FEATURES

- Just ask, don't query, forget traversing through a maze of query screens, selection filters and check boxes.
- Effortless integration with all your existing ERP Systems, as the SaaS module can be hosted on the Cloud or 'In-premise'.
- Launch within a week to get the basics operational. These self-learning LLMs will start training as you use them.
- Latest Generative-AI based LLMs are specifically trained on your Data schema / synthetic sample data exclusively.
- Your Data is never exposed, as we do not use the data, but it's schema only, for training these LLMs.
